Analytic Philosophy Without Naturalism: Debunking the Myth of a Naturalistic Turn

Analytic philosophy is often associated with naturalism, the view that the world is composed entirely of natural entities and that there is no room for supernatural or non-physical entities. However, in recent years, there has been a growing movement of analytic philosophers who reject naturalism and argue for the legitimacy of non-natural entities.

In this book, Analytic Philosophy Without Naturalism, a team of leading philosophers argue that the naturalistic turn in analytic philosophy was a mistake. They show that there are many good reasons to reject naturalism, and they offer a positive account of analytic philosophy that does not rely on naturalistic assumptions.
