The Definitive Guide to the Most Controversial and Important Topic in Education Today

Critical race theory (CRT) is a framework for understanding the intersection of race, racism, and power. Developed by legal scholars in the 1970s and 1980s, CRT has since been adopted by scholars in a wide range of fields, including education. In education, CRT has been used to challenge the traditional view of race as a neutral category and to highlight the ways in which race and racism shape the experiences of students in schools.
