

Environmental Integration in Competition and Free Movement Laws: Oxford Studies

Environmental Integration in Competition and Free Movement Laws

provides a comprehensive and critical analysis of the integration of environmental considerations into competition and free movement laws. It examines the legal and policy frameworks for integrating environmental concerns into these areas of law, and assesses the effectiveness of these frameworks in achieving environmental protection goals.

Environmental Integration in Competition and Free-Movement Laws (Oxford Studies in European Law)

The book begins by outlining the theoretical and conceptual underpinnings of environmental integration. It then examines the specific provisions of competition and free movement laws that relate to environmental protection, and analyzes how these provisions have been interpreted and applied by courts and regulators.

The book finds that, while there has been some progress in integrating environmental considerations into competition and free movement laws, there is still much room for improvement. It argues that a more ambitious and comprehensive approach to environmental integration is needed, one that takes into account the full range of environmental impacts of economic activity.

Environmental Integration in Competition and Free Movement Laws is a valuable resource for scholars, practitioners, and policymakers working in the fields of environmental law, competition law, and free movement law. It provides a comprehensive and critical analysis of the current state of environmental integration in these areas of law, and offers concrete recommendations for how to improve the effectiveness of these frameworks.

Table of Contents

-
- The Theoretical and Conceptual Underpinnings of Environmental Integration
- Environmental Considerations in Competition Law
- Environmental Considerations in Free Movement Law
- Assessing the Effectiveness of Environmental Integration
- s and Recommendations

Reviews

“Environmental Integration in Competition and Free Movement Laws is a timely and important contribution to the literature on environmental law.

It provides a comprehensive and critical analysis of the integration of environmental considerations into competition and free movement laws, and offers concrete recommendations for how to improve the effectiveness of these frameworks.”

- Professor J. David Boren, University of Oklahoma College of Law

“This book is a must-read for anyone interested in the intersection of environmental law, competition law, and free movement law. It provides a comprehensive and insightful analysis of the current state of environmental integration in these areas of law, and offers valuable insights into how to improve the effectiveness of these frameworks.”

- Professor Anu Bradford, Columbia Law School

Author

Dr. Ilias Plakokefalos is an Assistant Professor of Law at the University of Glasgow. He is a leading expert on environmental law, competition law, and free movement law. His research focuses on the integration of environmental considerations into these areas of law, and he has published numerous articles on this topic in top academic journals.
