- **Environment:** The environment in which a child grows up also has a major impact on their development. This includes the family environment, the school environment, and the community environment.
- **Experiences:** The experiences that a child has can also shape their development. These experiences include both positive experiences, such as learning new skills and making friends, and negative experiences, such as trauma or abuse.

The second part of the bundle, How to Talk to Kids, provides practical advice on how to communicate effectively with children. This advice includes:

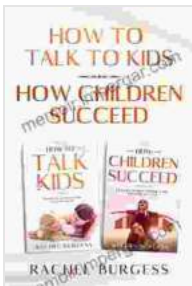

- **How to listen to your child:** It is important to listen to your child and really understand what they are saying. This means paying attention to their words, their body language, and their tone of voice.
- **How to talk to your child:** When you are talking to your child, it is important to be clear, concise, and respectful. You should also avoid using jargon or technical terms that your child may not understand.

- **How to resolve conflict with your child:** Conflict is a normal part of any relationship, including the parent-child relationship. It is important to have strategies in place for resolving conflict in a healthy and productive way.
